

# FibreLight

The ultimate connectivity  
for business

Our full fibre broadband, FibreLight, is a cost-effective, high-quality gigabit capable service.

Using a number of technologies, we supply a service to our customers that is always flexible and always efficient.

With the ability to increase bandwidth as your business requirements change, it's a connectivity option that truly future-proofs your organisation.

## Why FibreLight vs your current FTTP provider?

- 1. Fast install:** Go live in as little as 20 days.
- 2. Symmetrical:** Identical upload and download speeds.
- 3. Already in contract?** No problem. Contract buy-out options are available.
- 4. Need for speed?** Easily increase bandwidth as your business grows.

## Key features

- Low contention ratios of 8:1 - This means that your line will only ever be shared with a maximum of 8 other businesses to safeguard speed and performance.
- 24/7/365 support to provide peace of mind.
- Provided with a full SLA, this low contention service has the reliability of a dedicated line.
