

# FibreOne

The ultimate connectivity  
for micro-businesses

FibreOne is a full fibre connectivity option aimed at smaller businesses with smaller budgets and smaller teams. The amazing thing? It still allows you to transform your capability and potential through ultrafast gigabit connectivity.

As copper-based services become increasingly out-dated, full fibre is no longer a luxury, it's a requirement for any business in the modern world. Today, it is a necessity for future proofing your business so they can scale and communicate in uniquely effective ways.

FibreOne provides the perfect first step into the world of full fibre.

## Why FibreOne?

- It's an entry level fibre connection that goes straight into your premises (Fibre to the Premise, or FTTP for short).
- It is easily upgraded should your business and bandwidth requirements change (e.g. you may take on more staff or have some more data-hungry tech).
- Suitable for cloud applications and VoIP providing excellent quality of service.
- 100Mbps or 200Mbps download speeds, with market leading upload speeds of 50Mbps and 100Mbps for those large files and data transfer.

## Key features

- Minimum 24-month contract.
- 48 hours repair SLA (weekdays).
- Proactively monitored network to fix issues.
- UK-based specialist support team.
