

GUIDED VS SELF ASSESSMENT

When your business is trying to get certified for Cyber Essentials, you want the process to be as smooth and straightforward as possible. Although you can complete the Cyber Essentials self-assessment questionnaire by yourselves, the vast majority of businesses that go down this route fail to achieve the certification first time. This results in wasted time, effort and money.

That's why we offer guided alternatives starting from just £449.99, where you will have the advantage of our experienced security specialists on your side. We are with you every step of the way as you complete your certification so you can feel confident of a first-time pass and get there without the stress and frustrations of having to work everything out on your own!

 **Guided: Via Email (from £449.99)**
Our assessment team offers their expert advice and guidance over email to help assure you a successful certification first time. Exclusive guides are also available for download.

 **Managed: Via Video Call (from £499.99)**
You will be offered 1-2-1 sessions with an assessor who will guide you through the questionnaire over screen share, helping you quickly get through assessment and achieve a first time pass.

HOW DOES IT WORK?

We provide you with your logins to the assessment portal with full instruction and example guides

Our team reviews your assessment questionnaire before you submit, looking for any answers that would be marked as a 'fail'.

If any issues are identified, we will explain why these are vulnerabilities and how you can make the necessary changes to fix them.

Our cyber auditor will mark your assessment and award you the pass. You can then download the CE badge!

We will repeat this process until your business is ready to pass. Once you get the green light from us, you can submit for final marking,

Your in-house or external IT team can then complete remediation. If you do not have IT support, we can connect you with one of our trusted partners.
